

Application No. 09/813,209
Response to Final Office Action

Customer No. 01933

Listing of Claims:

1. (Currently Amended) A technical support server
comprising:

a service information portal section for providing web pages
as information input and output interfaces;

5 a knowledge base section for storing various claim reports
and solutions which correspond to the claim reports and which are
provided by an engineer who designs products in a product
technology department; and

10 a claim handling section for registering a new claim report,
corresponding to a new claim, in the knowledge base section, and
managing the registered new claim report as an unsolved claim
requiring an answer from the engineer;

15 wherein claim content of the new claim report is input via a
client web page in a format substantially similar to natural
language; [[,]] and

wherein the claim handling section comprises a synonym table
section for converting product unit information and problem
information included in the claim content to standard terms, and
the claim handling section: (i) produces the new claim report is
20 registered in the knowledge base section in a format including at
least a claim title structured as a combination of predetermined
items of definition information expressed in the standard terms,

based on the claim content in the format substantially similar
to natural language, by using the synonym table section,

25 (ii) searches the knowledge base section for claims similar to
the new claim report, and (iii) registers the new claim report in
the knowledge base section when it is confirmed that no claims
similar to the new claim report are present in the knowledge base
section.

Claim 2 (Canceled)

3. (Currently Amended) A technical support server
according to claim 2 1, wherein the claim handling synonym
table section has a synonym table for converting the information
available from the claim content input to the client web page
5 from a respective one of a plurality of different languages to
common codes.

4. (Currently Amended) A technical support server
according to claim 2 1, wherein the claim handling section
comprises an answer assisting module for, when the claim handling
section identifies a solution to the new claim as a search result
5 of the search of the knowledge base section, producing an answer
based on the solution so as to meet a technical support policy
varying from market region to market region.

20 terms, and the claim handling section: (i) produces the new claim
report in the knowledge base server in a format including at
least a claim title structured as a combination of predetermined
items of definition information expressed in the standard terms,
based on the claim content in the format substantially similar
to natural language, by using the synonym table section,
25 (ii) searches the knowledge base server for claims similar to the
new claim report, and (iii) registers the new claim report in the
knowledge base server when it is confirm that no claims similar
to the new claim report are present in the knowledge base server.

Claim 18 (Canceled).

19. (Currently Amended) A technical support system
according to claim ~~18~~ 17, wherein the claim handling server
comprises an answer assisting module for, when the claim handling
server identifies a solution to the new claim as a search result
5 of the search of the knowledge base server, producing an answer
based on the solution so as to meet a technical support policy
varying from market region to market region.

20. (Previously Presented) A technical support system
according to claim 17, wherein the claim handling server assigns
a supporting task for acquiring a solution to the new claim to a
